

PM Narendra Modi may set ball rolling for MoUs signed at Vibrant Gujarat Summit 2019

Prime Minister Narendra Modi may inaugurate the work for industrial projects for which Memorandums of Understanding (MoUs) were signed during the Vibrant Gujarat Summit (VGS). It is likely that the PM may inaugurate the initiation of a project by a Chinese company that proposed investments of Rs 21,000 crore at the Dholera Special Investment Region (SIR) and the Gujarat government is preparing for the event. The PM is scheduled to visit Ahmedabad towards the end of the month.

A senior official in the Gujarat government said, "The government has completed all the preparations for the inauguration, however, the final call will be taken by the PMO. The industrial project's inauguration by the PM will set the ball rolling for the inaugurations of other projects in the state too."

"It is also possible that the PMO gives a nod for the same during the next visit of the PM that can be scheduled in the first half of March. The PM may not go to Dholera or the project site but could inaugurate the work through remote operation as it will not be possible for him to move across multiple places during a one-day visit. Preferably, a place where the maximum crowd can be gathered will be chosen and from that perspective, Dholera is a dry region," added the official.

The official also mentioned that after these two visits, there might not be any other official visits by the PM to Gujarat although he would come for polls rally. He added that the PM would be busy with affairs related to the Lok Sabha polls and he might have to visit many other states.

The government has set a target of inaugurating projects in the state involving investments to the tune of Rs 1.11 lakh crore by March 31.

400 MOU TO BE KICKED OFF BY MARCH

Meanwhile, Chief Minister Vijay Rupani had recently announced that Memorandums of Understanding of Rs 1.11 lakh crore signed during Vibrant Gujarat Summits would be implemented by March. He said that by March-end, work would be kicked-off on more than 400 projects for which MoUs were signed. Also, the PM may not go to Dholera or the project site but could inaugurate the work through remote operation as it will not be possible for him to move across multiple places during a one-day visit.

Gujarat set to be the first region in India to use geothermal power

Gujarat is set to become the first state in India to use geothermal energy to produce electricity. The power plant being set up at Dholera will become operational in April.

"India's first geothermal power plant will start operating on a pilot scale in April in Dholera, and it will produce 20 kW of electricity. Dholera was chosen for the plant as immense heat has been found under the earth in the form of hot springs," the Centre of Excellence for Geothermal Energy (CEGE), set up by the state government at Pandit Deendayal Petroleum University (PDPU) said.

CEGE head Prof. Anirbid Sircar said that not much work on geothermal energy has been undertaken in the country. "We are the first to initiate an attempt to generate electricity with the help of geothermal energy," he said.

The release said that two geothermal bore wells were drilled at Dholera where water temperature was found to be between 47-50 degree Celsius. Hot water produced from the wells would be used for generating power using an Organic Rankine Cycle (ORC) technique.

"In 2016, CEGE had set up the first-of-its-kind geothermal space heating and cooling plant at Dholera. This will now be integrated with ORC to generate heat to run the turbine that drives a generator, which in turn will produce electricity," it said further.

Manan Shah, scientist at CEGE, said that the cost of the pilot project was around Rs 1 crore. "The initial investment in geothermal energy is 20-25 per cent higher compared to conventional power plant, but the additional cost is recovered in three years. Moreover, geothermal energy system has a longer life," he said.

Impact of Gujarat solar park on avian flyway worries MoEF panel

An expert panel of the Environment ministry has raised serious concerns about the impact the world's largest solar park – proposed at Dholera in Gujarat – will have on one of the nine major routes in the world used by migratory birds.

The 4,400MW capacity solar park, proposed in the Dholera Special Investment Region near the Gulf of Khambat will spread over 8,595.95 hectares and cost Rs 25,000 crore.

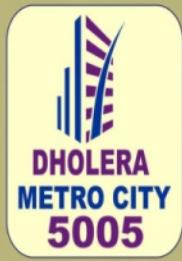

The Expert Appraisal Committee (EAC) raised serious concerns about coastal erosion, potential sea-level rise and project's impact on migratory birds while scrutinizing the project on January 25. While deferring appraisal of a major chunk of the project, it cleared a 1,000 MW component situated a little away from the inter-tidal zone, but it is still subject to clearance from the Wildlife department as the site is located near Velavadar National Park. Around 8,000 hectares of the project site falls in inter-tidal zone in the Coastal Regulation Zone (CRZ) which faces high erosion, particularly of mudflats which act as a natural flood barrier. EAC noted that the mudflats are ecologically sensitive and its characteristics should not be altered. The site falls under the Central Asian Flyway (CAF), one among nine flyways in the world that comprises multiple avian migration routes across 30 countries.

State authorities have been told to develop a model for the next 30 years, taking into account rising sea-levels, erosion and associated risks. They have been directed to refer to existing studies by the Bombay Natural History Society or conduct their own study.

An EAC member said that the project proposal did not include any related studies, and added that the panel will visit the site soon.
