

India's chip leap, robotaxi billions and the SDV shift in focus

The automotive industry's technology transformation is accelerating on multiple fronts from semiconductor self-reliance and software-defined vehicles to autonomous mobility and industrial robotics. Governments and corporations are now treating chips, AI and automation as strategic assets that will define competitiveness in the next decade. Meanwhile, rising robotaxi investments and tightening regulatory scrutiny highlight the growing gap between autonomy ambition and real-world deployment challenges. The week developments reflect how mobility is increasingly shaped by a convergence of hardware strength, software capability and safety governance.

DHOLERA

SEMICONDUCTOR HUB OF INDIA

India's first semiconductor fab in Gujarat's Dholera by 2028 : Union Minister Ashwini Vaishnaw

By 2026, four semiconductor plants will be ready, Vaishnaw stated, adding that the mission aims to make the country Atmanirbhar in the field of semiconductors.

India is on track to witness the establishment of its first semiconductor fabrication plant in Dholera by 2028. This follows a rapid expansion of the domestic industry, with four semiconductor plants expected to be ready by 2026 and two more by 2027, said Union Minister for Electronics and Information Technology, Ashwini Vaishnaw.

Addressing the gathering at the inauguration of the Kaynes Semicon Plant at Sanand, Gujarat, Vaishnaw outlined the progress made in the sector over the last year. He noted that while the first plant was inaugurated on February 28, the second facility has commenced operations today, March 31, with a third plant scheduled to begin work by July."

By 2026, four semiconductor plants will be ready," Vaishnaw stated, adding that the mission aims to make the country Atmanirbhar in the field of semiconductors.

The Minister emphasized the focus on building a complete domestic manufacturing ecosystem under the India Semiconductor Mission 2.0.

Under the Semicon 2.0, the Prime Minister has given clear guidance that the entire ecosystem must come to India, chemicals should be manufactured in India, gases should be manufactured in India, and the machines used for making semiconductor chips should be manufactured in India," he said.

Vaishnaw also highlighted the growth of the technical workforce. He stated that 60,000 engineers across 315 universities in the country are currently being prepared to compete globally. Today, India's second semiconductor plant has been inaugurated by the Honorable Prime Minister. The joy in every engineer's heart, the enthusiasm, and the dream of years that the Honorable Prime Minister has fulfilled today," he said.

Speaking to mediapersons on the sidelines of the event, Vaishnaw noted that the production at the Sanand facility started within 14 months of its foundation, which he attributed to diligent leadership and follow-up.

"Today is a day of pride for India. Today the second semiconductor plant has been inaugurated here in Sanand...The biggest thing is that today a new identity of India has been created in the world...PM Narendra Modi has provided guidance to develop the entire ecosystem...In 2026, production will start from a total of four plants. We are carrying forward the mission to make India self-reliant in the field of semiconductors," Vaishnaw told mediapersons.

Also speaking at the event earlier, Prime Minister Narendra Modi stated that "a new bridge has been built between Sanand and Silicon Valley," marking the current period as the "decade of India."

Highlighting the rapid growth of the domestic electronics landscape, the Prime Minister projected that by the end of this decade, India's semiconductor market could exceed USD 100 billion dollars". He noted that the commencement of production at this facility signifies India's strengthening role as a reliable semiconductor supplier in the global market.

The Prime Minister emphasized that India's own company, Kaynes, has now become a strong part of the global semiconductor supply chain. According to the Prime Minister, the intelligent power modules manufactured at the Sanand plant are already witnessing high demand internationally.

I have been told that a large part of the products made here have already been booked for export. For the California companies, Sanand's plant is providing intelligent power modules," he said, adding that these modules will reach American companies and will give power to the whole world from there.

He described this as a moment of pride that characterises the mantra of Make in India, Make for the world.",

Mansi Patel, Mayank bhai Patel, Archana kori
Today we visited about dholera side so thank you
very much to mansiji,Archanaji and mayankji. ...

Fabulous experience with the Dholera Sir Team and
especially with Mr Jayveer and Ms Kashish who
have the adequate knowledge about the product for
resolving all queries and to bring confidence and
satisfaction for the customers for decision ... [More](#)

If you want to invest your hard earned money in
Dholera please invest with a geniune people like
them...The most trusted and transperant company
in that area..Thank u so much mayurika ji...Highly
recommended

**Team is very supportive. They have shown each &
everyplace with all details. Specially Jagdish bhai
& Kashish greeted very warmly.**

Great project to invest
and DMC is very
cooperative which helps
at each step and Pooja
from DMC client
servicing is really helpful
and explains everything
in detail at each step.

WHO WE ARE MEET US!!

M/s. Dholera Metro City Group was incorporated with a objective to create value for the customers by ensuring a sure but steady appreciation and returns for our customers hard earned money. M/s. Dholera Metro City Group is rapidly evolving to become a global provider of premier lifestyles.

Dholera Metro City Group is engaged into the business of developing marvels out of the stone. Our objective is to ensure that each of our customers creates wealth by way of value appreciation of his/her prized possession their own space at Dholera Metro City. Dholera Metro City is an ideal destination for both end-users as well as investors looking for owning their Plot near New International Airport at Dholera Special Investment Region in Delhi Mumbai Industrial Corridor. Sometimes you need to change for the better. And that is exactly why, after spending all our life in real estate, we decided to establish a new distinctive organisation

with a fresh and futuristic approach to the real estate. Dholera Metro City Group simply means more ambitious projects, focused management, next-generation construction quality, futuristic features and much more that exceed your expectations. Welcome to new-age in real estate.

Welcome at Dholera Special Investment Region.

1. Dholera Metro City Group was incorporated in 2010.
2. DMC GROUP was conceived as a professional group to satisfy the needs of the discerning Residential/Industrial/Commercial Investment customers interested in sure returns on their investments.
3. The company endeavors to provide value for money to its customers.
4. Moreover, as a commitment to its stakeholders, The DMC GROUP has incorporated best business practices through business ethics and innovative solutions to achieve world class standards.
5. DMC GROUP has a clear objective of to create value for money for their customers by ensuring a sure but steady appreciation and returns for their customers hard earned money;
